Drappier Champagne

The Drappier family has been producing Champagne since 1808. This historic and pioneering house was instrumental in reintroducing Pinot Noir to the Aube post phylloxera, and it continues to work at the cutting edge of Champagne production. Provenance, excellence and distinctive style are the mantras, both in the vineyard, which is increasingly farmed according to organic principles, and in the cellar, where minimal use of sulphur is the rule and the wines remain unfiltered. In 2016, Drappier became the first 'carbon neutral' Champagne house.
